Professional Summary

Frontend Engineer with 3+ years of end-to-end ownership of production-grade fintech applications for Tier-1 banking clients including **Kotak Mahindra Bank** and **NSDL**. Specialised in Angular performance engineering, delivering an **83% reduction in API latency**, unblocking two critical application go-lives through full CSP compliance, and maintaining a **zero P0 bug record** across all production releases. Achieved a Lighthouse performance score improvement from 45 to 81. Took end-to-end ownership of three core modules — Dashboard, Reports, and Self-Onboarding — across both client platforms, driving each from architecture and API integration through testing and production deployment.

Work Experience

Software Engineer I

March 2023 – Present

iServeU Pvt. Ltd. | Bhubaneswar, Odisha

Frontend — Angular | Kotak Mahindra Bank & NSDL Banking Platforms

- Diagnosed and resolved sequential API waterfall chains on Kotak Mahindra's live dashboard by re-architecting them into concurrent **RxJS forkJoin** streams, achieving an **83% reduction in API latency** (60s → 10s) for thousands of active banking users.
- Unblocked two critical application go-lives (Kotak Mahindra & NSDL) by achieving full **Content Security Policy (CSP)** compliance — audited all third-party dependencies, migrated external assets to inline custom SVGs, and eliminated all external-resource policy violations.
- Elevated **Lighthouse performance score from 45 to 81** through systematic optimisation: bundle size reduction, lazy loading implementation, elimination of render-blocking resources, and measurable improvements to TBT, LCP, and TTI metrics.
- Modernised application state management by migrating from subscription-heavy RxJS patterns to **Angular Signals**, enabling fine-grained reactivity with significantly reduced boilerplate and improved maintainability.
- Designed and delivered **interactive D3.js transaction analytics dashboards** with real-time data visualisation for banking analysts, replacing legacy static data tables with dynamic, drill-down capable reporting interfaces.
- Engineered multi-level breadcrumb navigation for complex nested administrative workflows, significantly improving navigational clarity and user experience consistency.
- Maintained a **zero P0 bug record** across all Kotak Mahindra and NSDL release milestones while concurrently managing parallel multi-client sprint cycles in coordination with Backend, DevOps, and QA teams.

Technical Skills

Core Languages	HTML5, CSS3, JavaScript (ES6+), TypeScript
Frameworks & Libraries	Angular, React.js, Tailwind CSS
Data Visualisation	D3.js, SVG, Canvas, Interactive Charting
State Management	RxJS, NgRx, Angular Signals, Async Pipe, React Hooks
Security	AES-CBC / RSA Encryption, Content Security Policy (CSP) Compliance
Testing	Jasmine, Karma
Tools & DevOps	Git, JIRA, Docker, Nginx, Jenkins, CI/CD Pipelines, Lighthouse, VS Code

Projects

Personal Portfolio Website

Angular

Designed and developed a fully responsive personal portfolio website to showcase professional experience and technical skills. The site features a clean, minimalist aesthetic optimised for both desktop and mobile viewports, incorporating smooth interactions and accessible design principles.
