

Sunidhi Chattar

Frontend Engineer

📍 Bhubaneswar, Odisha 📞 +91-76450-61002 ✉ its.sunidhi.official@gmail.com 🌐 [sunidhi-chattar](#)

Professional Summary

Frontend Engineer with 3+ years of experience developing enterprise-grade web applications using Angular, TypeScript, RxJS, and modern frontend technologies. Skilled in building secure, scalable, and responsive applications, with strong expertise in Angular architecture, performance optimization, and API integration.

Work Experience

Software Engineer I

March 2023 – Present

iServeU Pvt. Ltd. | Bhubaneswar, Odisha

Frontend — Angular | Kotak Mahindra Bank & NSDL Banking Platforms

- Diagnosed and resolved sequential API waterfall chains on Kotak Mahindra's live dashboard by re-architecting them into concurrent **RxJS forkJoin** streams, achieving an **83% reduction in API latency** (60s → 10s) for thousands of active banking users.
- Designed and delivered **interactive D3.js transaction analytics dashboards** with real-time data visualisation for banking analysts, replacing legacy static data tables with dynamic, drill-down capable reporting interfaces.
- Orchestrated a zero-downtime phased migration from **Angular 14** to **Angular 19** modernized legacy code with **standalone components** and the new control flow syntax, while leveraging **Signals** to transition components to **OnPush change detection** for optimized rendering performance
- Implemented **AuthGuard**-based route protection across Kotak Mahindra and NSDL platforms, preventing unauthorized access and enforcing role-based navigation control throughout the application.
- Secured data transmission by engineering a centralized **HttpInterceptor** that automatically appends authorization headers and handles **AES-CBC/RSA encryption/decryption** for API traffic, while rewriting **Jasmine/Karma** unit tests to ensure **100%** stability.
- Elevated **Lighthouse performance score from 45 to 81** through systematic optimisation: bundle size reduction, lazy loading implementation, elimination of render-blocking resources, and measurable improvements to TBT, LCP, and TTI metrics.

Technical Skills

Core Languages

HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries

Angular v14+, Tailwind CSS, Bootstrap

Angular Internals

Lifecycle Hooks, Angular Forms, RxJS, NgRx, Angular Signals, Change Detection

Security/Testing

AES-CBC / RSA Encryption, Content Security Policy (CSP) Compliance, Jasmine/Karma

Tools & DevOps

Git, JIRA, Docker, Nginx, Jenkins, CI/CD Pipelines, Lighthouse, VS Code

Projects

Personal Portfolio Website

Angular

Fully responsive portfolio showcasing professional experience and **projects**, featuring a minimalist aesthetic, smooth interactions, and accessible design across desktop and mobile. 🌐 [sunidhi-portfolio-ten.vercel.app](#)

Education

Bachelor of Technology — Computer Science & Technology

Trident Academy of Technology, Bhubaneswar

2019 – 2023

CGPA: 8.23 / 10
